

# SET OF REGULATION

New generation of driving the wheels

Set of regulation

# BEST VALUE | SMART | ROBUST | COMPACT

MODULE, SENSOR, STEP MOTOR

KEY TO CODING

RREG + - XX - X - X - X

Regulation module \_\_\_\_\_

Holding torque: \_\_\_\_\_

00 – without motor

05 – 5.3 Nm

08 – 8 Nm

12 – 12 Nm

Sensor: \_\_\_\_\_

0 – without sensor

2 – sensor + 2 meter long sensor cable

3 – sensor + 2 meter long sensor cable

Cable connecting motor and regulation: \_\_\_\_\_

0 – without cable

2 – 2 meter long cable

3 – 3 meter long cable

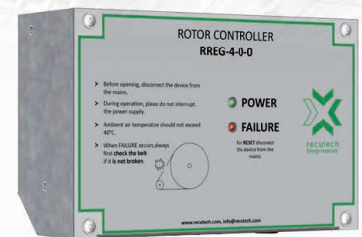

Magnet: \_\_\_\_\_

0 – without magnet

1 – with magnet

## ADVANCED REGULATION MODULE for your rotary heat exchangers

- Wheel rotation speed sensing
- Operation and malfunction signalisation
- Wheel speed control 0 - 10 V
- Auto restart when an error occurs
- Self-cleaning function with setting options
- Start up and braking time with setting options
- Connection via USB port

## SOFTWARE easy setting of your wheel

- Setting of all parameters manually or via barcode
- Fine tuning of the whole system
- Wheel rotation test
- Test of errors
- The accuracy of the input parameters test
- Test of motor
- Display your current settings
